TWO 13S4P//BAK18650CC

POWER TRAIN MANAGEMENT SOFTWARE INCLUDED

BLUETOOTH CONTROL VIA APP (iOS / Android)

POWER SWITCH 50% – 100%

REMOTE PARAMETER PROGRAMMING AND PARENTAL
CONTROL

The Torrot Vision

Torrot stopped manufacturing its reliable and – still today – popular bicycles and then was reborn in 2011, driven by a venture in which the passion to supply people with a sustainable, practical, popular means of transport is once again the maxim.

We have been designing our new family of products for two years, and now you can enjoy our new electrical and hybrid vehicles designed to go down in history.

That's why in 2011 we embarked on the adventure of designing technologically advanced vehicles which would ecologically fit within the world we live in today, with a brand that was extremely popular and famous in the past, Torrot. Torrot's philosophy back then was, in essence, the same as Torrot's today: to manufacture practical, comfortable, sturdy vehicles that make people's daily lives more fun and easier in terms of mobility.

In the new Torrot, everything revolves around these values and the maxim of caring for our world with appealing designs, cutting-edge technology and sustainable manufacturing.
